Overview

Since graduating from St Francis de Sales College with a Stage 2 SACE Certificate in 2014 I have taken 2016 as a gap year to explore my options with regard to a suitable vocation/occupation. This was also intended to provide me with an opportunity to travel and mature as a person. After finishing Year 12, I volunteered approximately three days per week with the Salvation Army Retail store in Mount Barker where I was able to expand my skills and customer service abilities. I then went on to fill a position with AM/PM as a Console Operator where I worked predominantly night shifts which demanded a significant level of maturity and dependability as I often worked alone. Now I am currently studying to become a software engineer through one of Adelaide Universities coding courses.
